New cohort to begin June 2019

master of arts
Instructional Technology

Offered at a distance for more than a decade, this program prepares professionals to be leaders in Instructional Technology in the classroom, district and beyond. Students focus on integrating technology into the classroom and graduates focus on bringing progressive change to Iowa and beyond. Coursework is designed to build skills and develop vision based upon best practice for using technology within the learning environment.

Program highlights
This program is designed to engage students in practical activities that can be used in their daily professional life. Students will build a lifelong network of professional colleagues and study with the same group of adult learners for the duration of the program.

Faculty are dedicated to your learning and hands-on experience as you develop the skills to create a professionally-designed digital portfolio that provides the artifacts and evidence to support your attainment of standards.

Flexible learning for a busy life
Courses are offered online using Blackboard, a dynamic platform that will enhance your learning experience and sense of community with fellow classmates. Most courses also meet via interactive video conferencing, with fall and spring sessions held on Tuesday evenings. Six-week summer sessions may be held weekdays and may include optional in-person instruction on the UNI campus.
