New cohort to begin August 2018

bachelor of applied science
Technology

Designed for graduates of career and technical programs from community colleges, the Technology Bachelor of Applied Science (B.A.S.) degree program focuses on industry – its organization, resources, processes and management technologies. Incorporating an applied approach to critical thinking, communication and problem solving skills, this program emphasizes the enhancement of management skills that build upon a strong technical background.

Program features
• Flexible online delivery designed for adult learners
• Dedicated faculty who have strong relations with industry professionals and employers
• Strong job placement – including leadership and management roles in manufacturing, computing, engineering and technology fields
• Cohort model – study with the same group of 20-25 students for the duration of the program
• Quality Matters – courses are designed using a set of professional standards based upon research and best practices for course design

Program requirements
• An A.A.S. degree – UNI accepts 60 transferable units of credit from any accredited two-year community college to be applied to the B.A.S. degree
• 120 units of credit – 60 units of transferable credit from A.A.S. degree and a minimum of 60 UNI credits
• Foreign language requirement – if not completed prior to joining the program, students should work with the recruitment coordinator for options

▶ see reverse side for more details

Ready to apply?
We encourage you to apply for admission through the University of Northern Iowa as soon as possible. Classes begin Aug. 20, 2018. Visit our website for detailed instructions.
